

The wheelchair swing platform allows the entire wheelchair to swing to and fro, thereby eliminating the need for a difficult wheelchair transition by the user. The platform is made of sturdy plastisol coated steel and features a ramp for easy wheelchair access and egress. The ramp simply folds up or down on hinge and can be securely locked in a closed position with easy-to-use chain clasps.

SportsPlay manufactures two sizes of swing platforms – an adult platform which measures 32" W x 38" L and a juvenile platform which is 26" W x 27" L. Weight capacity of the platform is 700 lbs. Motorized wheelchairs can also be accommodated on the adult platform, although the juvenile size is not meant for motorized chairs.

SportsPlay also makes an optional pull chain accessory, allowing users to enter, propel themselves, and exit the wheelchair platform on their own, if desired.

The wheelchair platform can be attached to almost any swing frame. SportsPlay sells several models of wheelchair accessible swings – with and without frame; permanent and portable versions; and with other swing products as part of an ADA swing.

Enabling kids of all ages and adults to enjoy the thrill of a fun swing.

At SportsPlay Equipment, we take great pride in helping to provide accessibility to people of all abilities on the playground. Nowhere is this more evident than in our development of our wheelchair swing platform... an industry first from SportsPlay.

The Leader in Fun.... And in ADA Swing Products.
